**Re: C31E Distribution Flexibility Services Procurement Statement 2022**

Eclipse Power Networks Limited are a fully licensed Independent Distribution Network Operator (IDNO) with just over 4,200 energised connections. We generally work with developers and ICPs, adopting networks designed for the requirements of each development to meet the capacity required. Our networks therefore do not currently have any spare capacity nor lack of capacity.

As a licensed IDNO, Eclipse Power has adopted licensed electricity networks throughout the UK.

Due to the widespread nature of our electricity networks and the lack of flexibility services required on our networks, we do not currently intend to procure flexibility services in either the short or longer term. Should this situation change we would signal this to Ofgem as soon as we are able to do so.

Given the long lead time of building new electricity networks, flexibility signals will be sent in a timely manner.

If you have any questions in relation to this statement, please contact me using the details below.

Yours sincerely,

Sarah Owen
