

Annex 1 – Open letter consultation on the Incentive of Connections Engagement

- 1.1. We would like to hear the views of interested parties in relation to any of the issues set out in our open consultation letter.
- 1.2. We would especially welcome responses to the specific questions which we have set out in our consultation and are replicated below.
- 1.3. If you have any questions on this document please contact:

James Veaney
Head of Connections and Constraint Management
Ofgem, 9 Millbank, London, SW1P 3GE
020 7901 1861
Connections@Ofgem.gov.uk

- 1.4. **Responses should be sent, preferably by e-mail by 17 August 2016 to the address above.**
- 1.5. Unless marked confidential, all responses will be published by placing them in Ofgem's library and on its website www.ofgem.gov.uk. Respondents may request that their response is kept confidential. Ofgem shall respect this request, subject to any obligations to disclose information, for example, under the Freedom of Information Act 2000 or the Environmental Information Regulations 2004.
- 1.6. Respondents who wish to have their responses kept confidential should clearly mark the document/s to that effect and include the reasons for confidentiality. Respondents are asked to put any confidential material in the appendices to their responses.
- 1.7. Next steps: We will consider the responses to this consultation and these will be used alongside other evidence for our assessment of the ICE plans.
- 1.8. Each of the questions asked by this consultation is set out in the template below.
- 1.9. Please ensure that you **indicate the DNO or specific licence area** to which your experiences relate.
- 1.10. When considering your responses to these questions, please consider your experiences, the actions that the DNO has undertaken or committed to undertake, and the actions that you consider it could reasonably undertake.

Response template – Incentive on Connections Engagement July 2016

Question	Response																														
About you and your work																															
1. What is the name of your company?	PowerCon (UK) Ltd																														
2. Which DNO's ICE submission is your response related to (see Annex 2 for DNO map)? Please indicate clearly in your response to the questions below whether your comments refer to the DNO's plans as a whole, or to one of the DNO's licence areas. If you wish to provide a response to the ICE submission of more than one DNO, please use a separate template for each DNO.	ENW Please note that PowerCon act as grid consultants to a number of developers and ICP's. Within the past year we have actually made very few grid connection applications but are required to act on behalf of their customer base in order to resolve connection problems and issues.																														
3. What type of connection do you generally require? And for each type of connection, how many connection applications, including total MVA (Mega Volt Ampere) of connections have you made in the past year?	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Type of connection</th> <th style="text-align: center;">Total number of connections</th> <th style="text-align: center;">Total MVA of connections</th> </tr> </thead> <tbody> <tr> <td>Metered Demand Connections</td> <td style="text-align: center;">Low Voltage (LV) Work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">High Voltage (HV) Work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">HV and Extra High Voltage (EHV) Work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">EHV work and above</td> <td style="text-align: center;">None</td> </tr> <tr> <td>Metered Distributed Generation (DG)</td> <td style="text-align: center;">LV work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">HV and EHV work</td> <td style="text-align: center;">None</td> </tr> <tr> <td>Unmetered Connections</td> <td style="text-align: center;">Local Authority (LA) work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">Private finance initiatives (PFI) Work</td> <td style="text-align: center;">None</td> </tr> <tr> <td></td> <td style="text-align: center;">Other work</td> <td style="text-align: center;">None</td> </tr> </tbody> </table>	Type of connection	Total number of connections	Total MVA of connections	Metered Demand Connections	Low Voltage (LV) Work	None		High Voltage (HV) Work	None		HV and Extra High Voltage (EHV) Work	None		EHV work and above	None	Metered Distributed Generation (DG)	LV work	None		HV and EHV work	None	Unmetered Connections	Local Authority (LA) work	None		Private finance initiatives (PFI) Work	None		Other work	None
Type of connection	Total number of connections	Total MVA of connections																													
Metered Demand Connections	Low Voltage (LV) Work	None																													
	High Voltage (HV) Work	None																													
	HV and Extra High Voltage (EHV) Work	None																													
	EHV work and above	None																													
Metered Distributed Generation (DG)	LV work	None																													
	HV and EHV work	None																													
Unmetered Connections	Local Authority (LA) work	None																													
	Private finance initiatives (PFI) Work	None																													
	Other work	None																													
Consultation questions																															

Section 1: Looking Back report 2015-16

We want your views on how well the DNOs have performed over the last year

1. Are you satisfied that the licensee had a comprehensive and robust strategy for engaging with connections stakeholders? Do you consider that the licensee implemented its strategy? If not, are you satisfied that the licensee has provided reasonable and well justified reasons?	<p>Yes, ENW do had a comprehensive engagement strategy.</p> <p>Yes we consider that ENW implemented that strategy – noting that there remains some work to complete, particularly with regard to connections project delivery.</p>
2. Are you satisfied that the licensee had a comprehensive work plan of activities (with associated delivery dates) to meet the requirements of its connections stakeholders? Do you consider that the licensee delivered its work plan? If not, are you satisfied that the licensee has provided reasonable and well justified reasons?	<p>Yes, we are happy with the plan as produced.</p> <p>Within the 'application process' we believe that ENW have already taken steps to ensure that expectations are met.</p> <p>To date we have not experienced problems with inter-tripping for projects within the ENW area noting that this is probably a function of the geographical terrain rather than any other reason. This is a problem within other DNO areas.</p>
3. Do you consider that the licensee's work plan provided relevant outputs (eg key performance indicators, targets etc.)? Are you satisfied that the licensee has delivered these outputs? If not, do you view the reasons provided to be reasonable and well justified?	Yes.
4. Do you agree that the licensee's strategy, activities and outputs have taken into account ongoing feedback from a broad and inclusive range of connections stakeholders? If not, has the DNO provided reasonable justification?	Yes to the best of our knowledge.

Section 2: Looking Forward plans 2016-17

We want your views on what the DNOs aim to achieve in the coming year

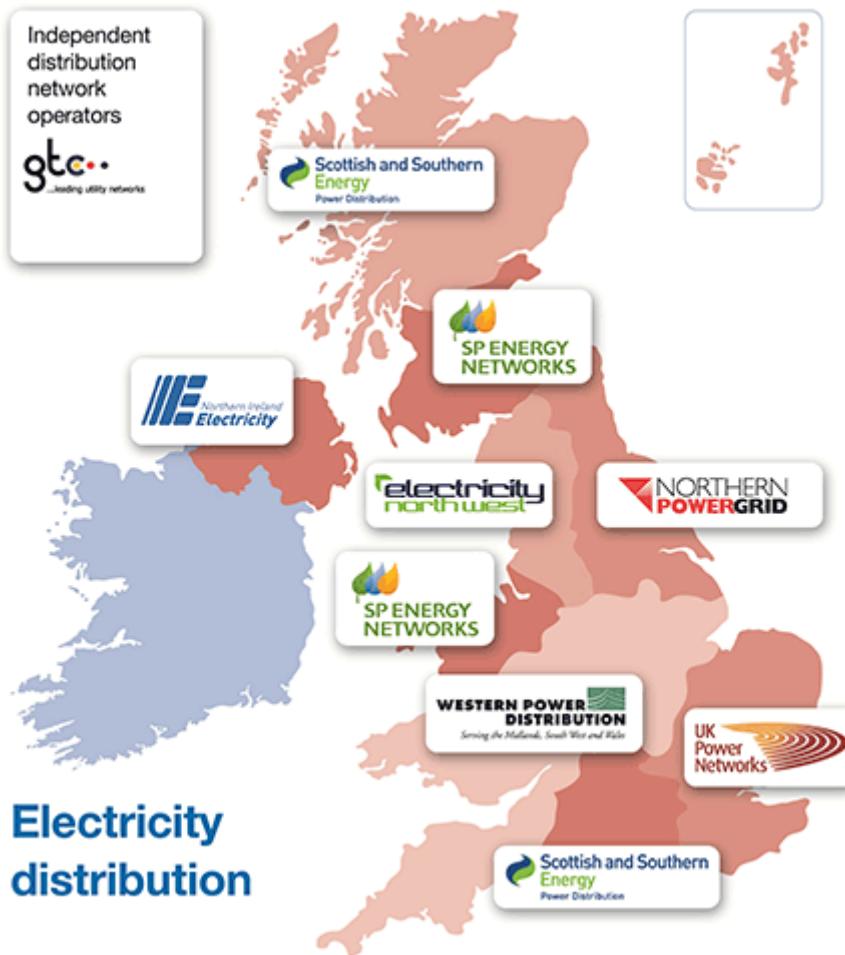

5. Are you satisfied that the licensee has a comprehensive and robust strategy for engaging with connection stakeholders and facilitating joint discussions where appropriate?	<p>Yes.</p> <p>We are able to confirm that we are regularly invited to seminars and connection workshops as offered by ENW and requested to provide suggestions and feedback. We value this arrangement.</p> <p>We are also able to confirm that we are able to contact members of the ENW Planning and delivery teams as and when it is considered to be appropriate.</p>
6. Do you agree that the licensee has a comprehensive work plan of activities (with associated delivery dates) that will meet the requirements of its connection stakeholders? If not, has the licensee provided reasonable and well-justified reasons? What other activities should the DNOs do?	Yes, we are happy with the work plan.
7. Do you consider that the licensee has set relevant outputs that it will deliver during the regulatory year (eg key performance indicators, targets, etc.)?	Yes.
8. Would you agree that the licensee's proposed strategy, activities and outputs have been informed and endorsed by a broad and inclusive range of connection stakeholders? If they have not been endorsed, has the licensee provided robust evidence that it has pursued this?	Yes – to the best of our knowledge.

We also want your views on how DNO plans will address issues for new connections in constrained areas

9. Where flexible connection offers are available, do you consider that the DNO's work plan for 2016-17 sufficiently address concerns about the uncertainty of	<p>Curtailment issues and curtailment levels remain a serious concern and have been the subject of an ENA/DNO consultation and I believe we are awaiting a full and formal communication of the output.</p> <p>This therefore remains a point of concern and contention but we accept that</p>
--	--

curtailment levels? For example, do their plans ensure that stakeholders have access to the data they require for an investment decision?	this is not the sole responsibility of this particular DNO.
10. Where consortium connections are available, do you consider that the DNO's work plan for 2016-17 reflect requirements for clear and detailed information about where, how and under what conditions such projects can proceed?	Following (rather negative) discussions within the DG Steering Group we have chosen, with regret, not to actively seek work on this front. Therefore, we do not have any direct experience relating to this topic.
11. Where consortium connections are available, do you consider that the DNO's work plan for 2016-17 reflect requirements for clear and detailed information about where, how and under what conditions such projects can proceed?	Splitting grid connection offers in order to facilitate consortia connections, especially community schemes, were discussed at the DG Steering Group and met with opposition from a number of DNO's. We are pleased to report that ENW were one of the few to embrace the consortium connections issues and, we understand, with a very positive outcome.
12. Do you consider that the DNO's work plans include appropriate engagement to ensure that network investment plans are well communicated to stakeholders, including when new capacity will become available?	Yes we consider that ENW have been proactive in communicating their work plans.
13. Do you consider that the DNOs' plans include appropriate activities to improve, where necessary, the provision of information on constrained areas of the network to provide better data about where connections may be viable?	Whilst the ENW heat maps may not be the best available we should note that we believe that this is a deliberate and valid strategy based on the fact that we are always welcome to discuss projects and potential projects at an early stage to identify potential problems. We would suggest that ENW are probably the most approachable of all of the DNO's.
14. Are there particular additional activities or outputs which you consider should be included in the work plan of activities to better facilitate grid connections?	We are generally very pleased with the level of service provided with the ENW area.
