Project code:	NPGT202/1	Question Number	NPG021
Question date	11/09/12	Answer date	13/09/12
Submission section question relates to	Section 9		
Topic	Successful Delivery Reward Criteria		
Question	NPG provided a set of revised Successful Delivery Reward Criteria in their presentation material on 4th September. Please can they provide these in a formal question response.		
Notes on question			
Answer	<p><b>SDRC 1</b></p> <p><i>Criterion:</i></p> <ul style="list-style-type: none"> <li>• Produce robust recommendations on measures required for DNOs to make use of demand side response (DSR) based on robust trialling of the Methods.</li> </ul> <p><i>Evidence:</i></p> <ul style="list-style-type: none"> <li>• Initial customer engagement plan submitted for approval by Ofgem in July 2013 for the DNO-TSO trials and September 2013 for the multi-party trials.</li> <li>• Initial customer recruitment for the network operator trials completed by December 2013 and for multi-party trial by November 2014.</li> <li>• Analysis of results of customer engagement and participation produced by December 2016.</li> <li>• Report setting out the contribution DSR can make to DNOs and recommendations on measures required to allow DNOs to make use of DSR produced by December 2016.</li> </ul>		

## **SDRC 2**

### *Criterion:*

- Produce recommendations on measures required for DNOs to trade and share DNO-storage based on robust trialling of the Methods.

### *Evidence:*

- Trial design document determining how to design electrical energy storage (EES) element of trial for robust results produced by February 2014.
- Technical requirements for EES to participate in trials specified by December 2013.
- Analysis of results of the trials relating to storage produced by December 2016.
- Report setting out the contribution storage can make to DNOs and recommendations on measures required to allow DNOs to trade and share storage produced by December 2016.

## **SDRC 3**

### *Criterion:*

- Ensure technology is in place to allow the project to access flexibility which will demonstrate robust and applicable trialling of each Method.

### *Evidence:*

- Monitoring equipment in place by start of trials: December 2013 for the DNO-TSO trials and November 2014 for the multi-party trials.
- British Gas technologies for the trial in place by November 2014.
- Platform commissioned by October 2014.

## **SDRC 4**

### *Criterion:*

- Design and undertake robust network operator (DNO-TSO) trial, analyse the results and produce recommendations.

### *Evidence:*

- Trial design document produced by October 2013.
- Operating procedures and commercial frameworks for the trial produced by December 2013.
- Trial undertaken December 2013-June 2014.
- Assessment of trial produced by December 2014.

## **SDRC 5**

### *Criterion:*

- Design and undertake robust multi-party trial, analyse the results

and produce recommendations.

*Evidence:*

- Evidence to inform whether or not to proceed with the multi-party trial produced by October 2013
- Results of the techno-economic modelling to inform multi-party trial design produced by May 2014.
- Results of social research to inform the design of the multi-party market produced by May 2014.
- Market design document produced by May 2014.
- Trial design document produced by September 2014.
- Prototype market trading platform delivered by the end of November 2014.
- Multi-party trials undertaken from winter 2014/15 to winter 2015/16.
- Assessment of trials produced by December 2016.

**SDRC 6**

*Criterion:*

- Produce recommendations and roadmaps which set out how the Methods could best be applied to all DNOs, and communicate this learning.

*Evidence:*

- Engineering guidelines and codes of practice for use of flexibility by a DNO produced by December 2016.
- Six-monthly progress reports submitted to Ofgem throughout the Project.
- Economic, social and technical evaluation of both Methods produced by December 2016.
- Close down report submitted to Ofgem in December 2016.
- Roadmap for network operator trilateral contracts by January 2015.
- Roadmap for multi-party market by December 2016.

**SDRC 7**

*Criterion:*

- Ensure a plan has been created which enables the Project to deliver the key project milestones and outputs.

*Evidence:*

- Project structure populated with identified resources issued by July 2013.
- Project management methodology description, project governance framework and detailed project plan issued by July 2013.
