1<sup>st</sup> April 2022

Dear Louise,

**Re: Electricity Distribution Licence Condition 31E - Distribution Flexibility Services Procurement Statement**

Last Mile Electricity Limited (LMEL) is an Independent Distribution Network Operator (IDNO) that owns electricity distribution networks throughout the UK with approximately 203,000 connected customers.

Please find below the below reporting submission in relation to the new electricity distribution licence condition 31E (C31E).

**1. Flexibility Services Requirements**

All LMEL networks are designed for the capacity that is required and we have not identified any requirements for flexibility services during the year 1<sup>st</sup> April 2022 to 31<sup>st</sup> March 2023. Therefore, we currently have no plans to procure any flexibility services as there is sufficient capacity for current and projected future demand.

If any need arises in the next 12 months for LMEL to procure such flexibility services, we shall comply with C31E and publish the outcomes of a tender within a month of contractual agreement.

**2. Tendering process**

Not applicable.

**3. Stakeholder engagement**

Not applicable.

**4. Detailed quantitative assessment**

Not applicable.

Yours sincerely,

Richard Welsby
